

Project brief

TWO PAGES / EXPLICIT PAGE BREAK EXAMPLE

01 Overview

This fictional brief uses an explicit page break between the overview and the delivery checklist. The header and footer repeat on both pages.

Objective

Create a simple, readable document that can be inspected locally and printed as a PDF without uploading the source file.

- Keep headings and body copy easy to read.
- Use embedded assets and standard fonts.
- Review final pagination in the browser print dialog.

02 Delivery checklist

1. Confirm both pages are present.
1. Check the repeated header and footer.
1. Select text in the resulting PDF.
1. Verify no blank page was added.

Acceptance note

This sample contains a deliberate page break. Documents that rely on automatic Word pagination may produce different page boundaries in a browser.
